Exam Name:	Novell NetWare 5.1 Advanced Administration		
Exam Type	Novell	Exam Code:	50-654
Doc. Type:	ExamGuru Actual Exam Questions	Total Questions:	153

Question: 1

What is the maximum number of node addresses available on the IP Supernet 215.100.16.0/21?

- A. 254
- B. 510
- C. 1022
- D. 2046
- E. 4094

Answer: D

Question: 2

What is the responsibility of the Application layer of the OSI model?

- A. Error control.
- B. Frame synchronization.
- C. Session administration.
- D. Provide network services.
- E. End-to-end delivery and session multiplexing.

Answer: D

Question: 3

Which layer of the OSI model is responsible for routing?

- A. Network
- B. Session
- C. Physical
- D. Transport
- E. Data link
- F. Application

Answer: A

Question: 4

A network administrator was assigned two class C network addresses despite needing a single network with 600 nodes. How might the administrator achieve a single, 600 node network?

- A. Route the networks.
- B. Bridge the networks.
- C. Subnet the networks.
- D. Supernet the networks.

Answer: D

Question: 5

Which two IP address criteria are required for Supernetting? (Choose two)

- A. Addresses must be consecutive.
- B. The address must be Class B.
- C. The subnetmask must contain at least 20 bits.
- D. The third octet of the first address must be evenly divisible by 2.
- E. The third octet of the first address must be evenly divisible by 23.

Answer: A, D

Question: 6

Which features are associated with link state routing? (Choose two)

- A. Counts hops.
- B. Converges quickly.
- C. Uses a cost metric.
- D. Requires very little configuration.
- E. Recalculates entire routing database before forwarding changes.

Answer: B, D

Question: 7

Which elements form an IPX address used for internetwork communication? (Choose three)

- A. Subnet mask
- B. Node address
- C. Socket number
- D. Network address

Answer: B, C, D

Question: 8

Select the link state routing protocol. (Choose two)

- A. RIP
- B. LAT
- C. SNA
- D. NLSP
- E. RTMP
- F. OSPF

Answer: D, F

Question: 9

Identify the NDS user object created by default.

- A. Supervisor
- B. Container
- C. Admin
- D. Template

Answer: C

Question: 10

What are the mandatory property values for a user object?

- A. Login name, preferred server.
- B. Login name, lastname.
- C. Login name, location.
- D. Login name, workstation type.

Answer: B

Question: 11

Exam Name:	Novell NetWare 5.1 Advanced Administration		
Exam Type	Novell	Exam Code:	50-654
Doc. Type:	ExamGuru Actual Exam Questions	Total Questions:	153

Which statement best describes the implications of giving a user the supervisor object right to a server object?

- A. This gives the user ability to create another server object in the tree.
- B. This gives the user ability to shut down the server using the NetWare Administrator utility.
- C. This gives the user the ability to place IRFs on any container in the tree.
- D. This gives the user Supervisor file system rights to all volumes linked to that server.
- E. This gives the user ability to delete any object in the tree.

Answer: D

Question: 12

Identify the correct statements concerning All Property Rights vs. Selected Property Rights. (Choose two)

- A. The All Properties option can only be used at the container level.
- B. The Selected Properties option grants the level of access an object trustee has to all properties of the object.
- C. The Selected Properties option can only be used at the container level.
- D. Rights granted through Selected Properties overwrite rights granted through All Properties for the selected property.
- E. The All Properties option grants the level of access an object trustee has to all properties of the object.

Answer: D, E

Question: 13

Which statement is true regarding Novell Application Launcher?

- A. It creates and displays application objects.
- B. It takes a snap shot of the current machine configuration.
- C. It delivers application to the start menu.
- D. It allows applications to be distributed to users workstations and to be managed as objects in the NDS tree.

Answer: D

Question: 14

Which statement is true of a public access printer? (Choose two)

- A. It has no corresponding NDS object.
- B. It offers simple or automatic client installation.
- C. It has low security.
- D. It offers a full range of event and status notification options.

Answer: A, C

Question: 15

Which statement object best describes the container object?

- A. An NDS object located at the end of a branch in the NDS tree.
- B. An NDS object that serves as an originator and the final destination of network traffic.
- C. An NDS object that holds other objects and provides them with rights and services.
- D. An NDS object that identifies categories of information associated with an object.
